RE: ATM Case UPS freight rates

The NAC Affinity Program for ATM paper rolls with Paper Systems Inc. (PSI) has already included **the cost of shipping within the continental US on assorted orders of 25 cases or more.**

For orders of 1-24 cases, freight will be charged in addition to the quoted product prices. Because of the complexity of UPS shipping zones and different case weights, the attached UPS chart **is not** an exact rate calculator, but it will give you an approximation of the freight cost for any given order. PSI has included, on the Affinity Program Pricing spreadsheet, the weight per case of each ATM paper type. Orders under 25 cases can also be shipped via LTL, if the total case weight is over 475 pounds to one destination. (The LTL rate is lower than the UPS rate.)

It is our intention to update the UPS rates annually for your convenience in approximating the UPS shipping charges. UPS rates in some zones may also be higher for shipments to some smaller cities, primarily in the US Western states.

Thank you for your attention to this information and please let us know if there are additional questions of we can be of other assistance.
